TOWN OF STONINGTON

152 Elm Street • P.O.Box 352 • Stonington, Connecticut 06378-0352

November 28, 1994

Cable Systems
57 Cottontail Lane
North Haven, Ct. 06473

Gentlemen:

I am writing to express my appreciation for the efforts of two of your employees during the recent installation of a new telephone system at Town Hall. Despite some adverse conditions, these two employees, Scott Perillo and Chrism Michailidi, worked diligently to successfully complete the installation of cable throughout Town Hall and the Highway Garage. Their willingness to go "above and beyond" their scheduled tasks however, has earned them my deepest appreciation, and speaks highly of their skills, resourcefulness and "can do" attitude which any organization can be proud of.

Their quick action on Wednesday, November 16th, allowed "business as usual" to take place following the complete inactivation of the new system. Shortly after the telephones were discovered to be inoperable on that day, Scott and Chris arrived to resume their previous day's work prior to the arrival of TCI personnel. Once aware of the situation, Scott seized the initiative and feverishly went to work to activate the emergency back-up system while trouble shooting the main system. The result was that telephone communication was continuously available and the main problem identified and resolved in a short time.

I wish to compliment their efforts on the Town's behalf and hope you will pass this thank you to them.

Very truly yours,

George R. Sylvestre
Director of Administrative Services
